

DETACK

Eliminates Sealant Tackiness

Economical, time saving, detackifying solution for hot pour sealant application.

CRAFCOTM
AN **ERGON** COMPANY **INC**

"Pavement Preservation Products"

The smart choice over messy sand or silly toilet paper blotting applications.

DETACK saves money, time and increases efficiency. No need to wait until the sealant has cooled before opening the pavement to traffic. Use DETACK in place of sand or silly toilet paper to reduce traffic control issues, shorten lane closure and wait time. DETACK is an economical, biodegradable liquid that eliminates the surface tack on freshly applied hot pour sealants. A one-man operation, with a quick spray of DETACK your pavement is ready for traffic. If you're stuck for an economical, time saving, detackifying solution then DETACK from Crafcro is your answer.

Stop the "STICK" on freshly applied sealant.

Now you don't have to wait until the sealant has cooled before opening the pavement to traffic.

- Applies over hot sealant
- Eliminates tracking
- Eliminates blotting
- Eliminates sticking
- Increases production
- Decreases labor cost
- Reduces traffic closures
- Protects sealant integrity

DETACK is supplied ready to use in 5 gallon (19L) plastic pails. To use, DETACK is poured into typical hand pump pressurized garden sprayers. The spray pattern should be adjusted to a medium fan. DETACK should be applied to the sealant immediately after sealant is placed, or at any time after sealant is placed when surface tack is present. Usage rate of DETACK is typically 1 gallon (3.8L) per 1000-2000 linear feet (305-610m) of sealed cracks. DETACK should be applied to cover the sealant surface with minimal excess of application onto the pavement surface. The use of this product in no way supersedes the warnings and instructions furnished with the sealant used. Follow Application Instructions on the product container prior to use. DETACK is a water based product and should not be exposed to freezing temperatures.

*Economical
and
Biodegradable*
