60" X 41.5" Storage Deck Flip-Up Ramp

Crafcro Worldwide Support

The Crafcro Super SEALCOATER has been engineered for lasting performance. The advanced design of the Crafcro Super SEALCOATER features an **unbreakable** steel tank with six bolt plumbing system for easy disassembly, making maintenance fast and easy. A wide step tread fender provides the operator safe access to the double, non-drip loading lid. The large front storage area sports a flip up deck ramp for easy loading. Towing is made easier with torsional axles and a choice of hitches. Production is enhanced with larger sized plumbing and material pump system powered by an efficient electric start engine and high volume compressor. But more important than the impressive features of this equipment is that it is manufactured with Crafcro quality and is backed by the Crafcro support network.

Crafcro Engineered Performance Design

Designed for the contractor, the Crafcro Super SEALCOATER's standard features are considered options on all other competitive seal coat machines. Quality parts and superior construction make the Super SEALCOATER the machine of choice for everyday rigorous use. Features such as the unbreakable steel tank to the oversize hydraulic system set this unit apart from all the others. Built with Crafcro quality and engineered to last, choose the Super SEALCOATER for your next seal coat machine.
